# CG Dollar Fund

Overview

## **CG Dollar Fund Overview**

## **Investment Objective**

- To achieve long-term capital appreciation and income growth via long-only investment in US government inflationlinked bonds
- Simple low-cost approach, no gearing, no short selling
- The fund is actively managed, without reference to a benchmark

#### **Fees and Structure**

- Size: £565m (launched in May 2009)
- Management Fee: 0.25% (<£1bn) / 0.15% (>£1bn) | Total Expense Ratio: 0.35%
- Daily priced Irish UCITS
- Available in GBP hedged, EUR hedged and USD unhedged share classes

#### **Investor Profile**

## The fund has a broad range of investors who typically exhibit the following characteristics:

- A long-term investment horizon
- An aversion to significant short-term losses
- A desire to generate returns that outpace inflation over the long term

## **CG** Asset Management Overview

<b>2001</b> Founded	Founded in 2001 by Peter Spiller, former Chief Investment Officer and Chief Strategist of Cazenove
<b>£3.0bn</b> AUM	£3.0bn in assets under management
<b>2</b> Strategies	Manages two strategies, absolute return and real return, across six funds
13 Employees	Team of 13, based in London
262x Return	Low-cost offering, with fee reductions regularly reviewed
<b>2</b> Down Years	Capital Gearing Trust ("CGT") has returned 262x since 1982, with only two down years

## **CGAM** in partnership with our clients

## What makes us different? What does that mean for our clients? The client comes first The firm's founding Don't be greedy principles 3. Have fun In turn these principles mean that: We have and will close funds to **protect investors** We continuously strive to lower fees, even on closed funds We have low staff turnover **Employee owned** Majority owned by an Employee Ownership Trust, which means we will remain independent All portfolio managers are significant shareholders in CGAM The right incentives A significant majority of our own capital is invested in our funds Our interests are directly aligned with those of our clients

## **Funds Summary**

Strategy	Fund	ISIN	Launched	AUM <sup>6</sup>	Dealing Frequency	AMC Fee	TER

**Prath Ketheeswaran** Operations Apprentice

Jason Barlow Senior Operations Manager

Finn Chief Morale Officer

**Risk & Compliance** 

**Amber Williams** Head of Compliance

**Sindy Somander** Finance & Reporting Manager

CG Dollar Fund

## CG Dollar Fund's positioning is decided via a top-down process

Real yield outlook

Duration

Curve positioning

Stock selection

- Outlook for nominal interest rates
- Monetary and fiscal stance
- Inflation expectations vs. breakevens
- Forward rates

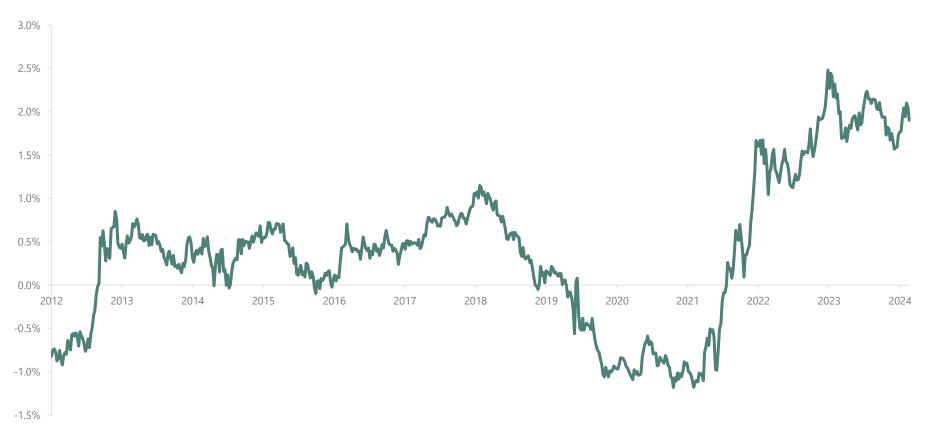

- Where prospective returns are strong, we will lock these in for a long time
- Shape of yield curve
- Market segmentation
- Scenario analysis

- NSS yield curve modelling to identify over/undervalued securities
- Adjustments for convexity and seasonality

# US real yields are elevated relative to recent history and against most estimates of r\*. This leads us to favour long duration

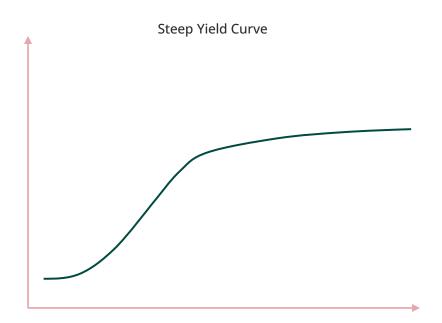

## **US TIPS Yield: 10-year history**

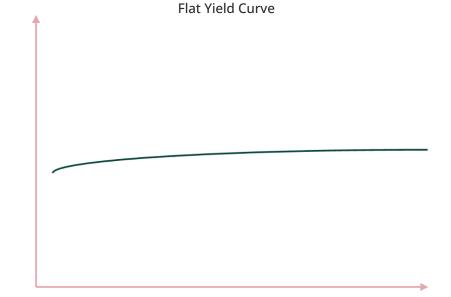

Source: Bloomberg Finance L.P.

# The shape of the yield curve, combined with our expectations, drives our curve positioning. The current flatness of the yield curve leads us to prefer a barbell strategy

- Roll down is a significant contributor to total return;
- Prefer 'belly' of the curve, where gradient is steepest.

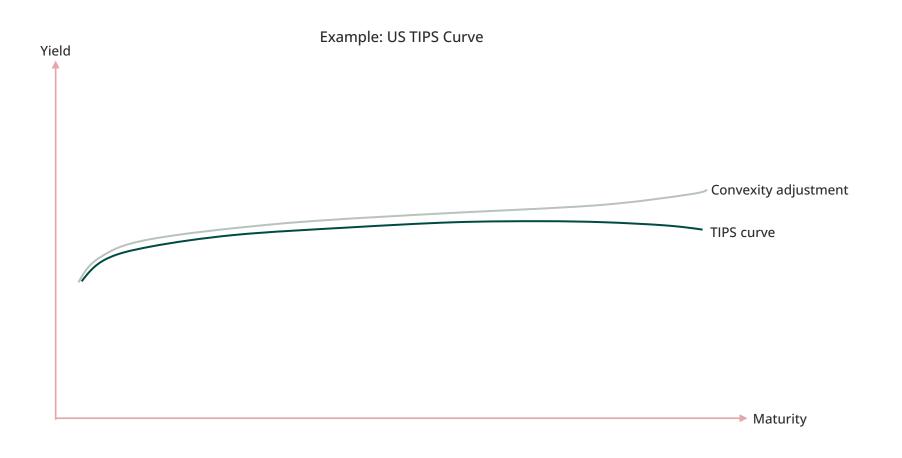

- No roll down, so favour convexity at long end;
- Prefer a barbell strategy, favouring front and long end of curve.

# We use a Nelson Siegel Svensson formula to identify individual under and overpriced bonds

$$y = \beta_0 + \beta_1 \frac{\binom{1 - e^{\left(-\frac{\mu}{\tau_1}\right)}}{\frac{\mu}{\tau_1}} + \beta_2 \left(\frac{\binom{1 - e^{\left(-\frac{\mu}{\tau_1}\right)}}{\frac{\mu}{\tau_1}} - e^{\left(-\frac{\mu}{\tau_1}\right)}\right) + \beta_3 \left(\frac{\binom{1 - e^{\left(-\frac{\mu}{\tau_2}\right)}}{\frac{\mu}{\tau_2}} - e^{\left(-\frac{\mu}{\tau_2}\right)}\right)$$

## We then adjust our expected yields for the impact of convexity at longer durations

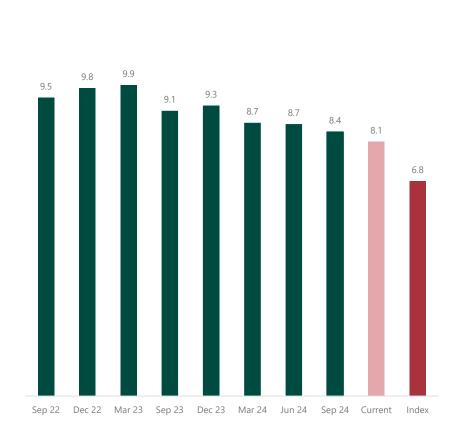

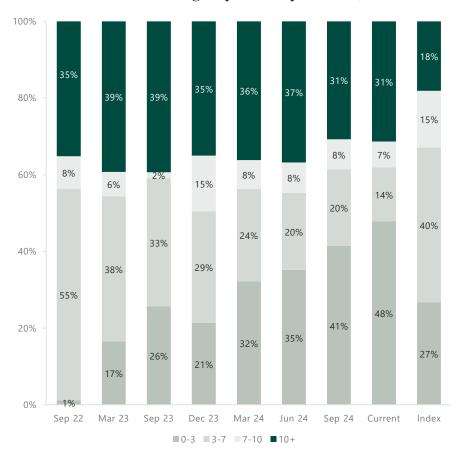

#### CG Dollar Fund

# In response to the attractive yields on offer, the Dollar Fund's duration is longer than the index

## Portfolio Duration (Years)

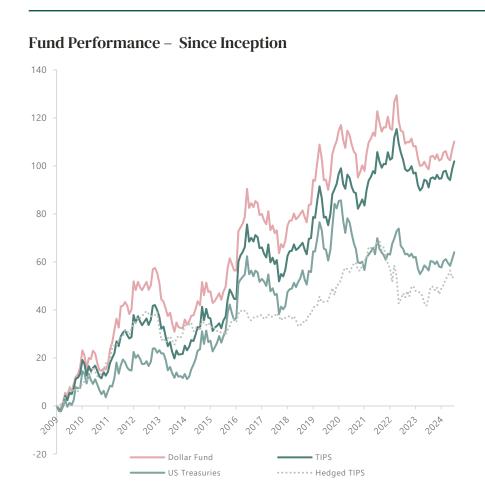

## Portfolio Curve Positioning – By Maturity Bucket (Years)

The role of index-linked bonds in a multi-asset portfolio

## Index-linked bonds are a fundamental component of a diversified portfolio

## Inflation as greatest risk to investor wealth

Against which equities are only a partial hedge

## Significant risk of inflation persistence

The historical record does not support a swift return to the target

## Historic outperformance vs nominal bonds

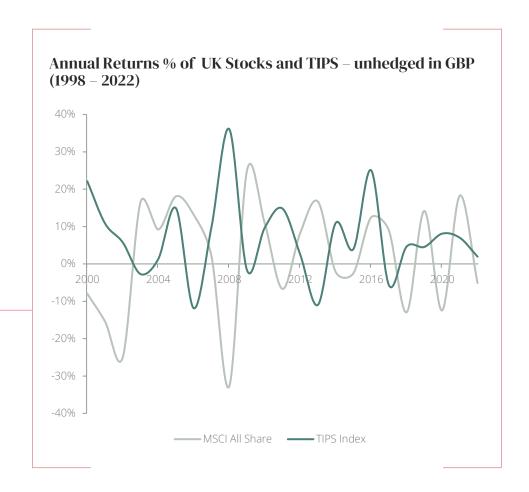

Such outperformance is likely to persist into the future

## Negative correlation with risk assets

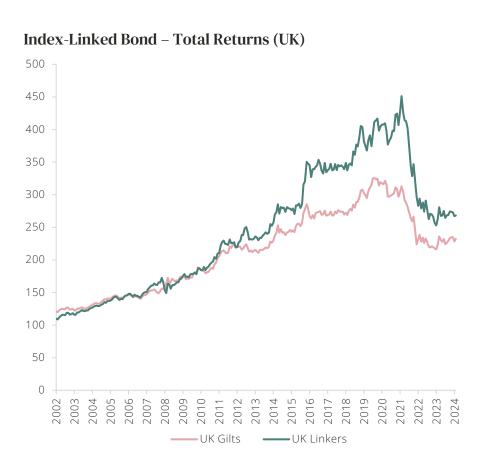

Index linked have historically proven to be a good hedge against a portfolio of risk assets

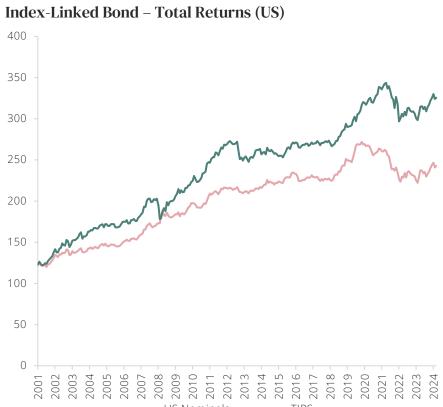

## Protection against financial repression

Only asset that we believe is likely to deliver protection

# Index-linked bonds have outperformed nominal bonds since the turn of the century. Why? Because the market systematically underestimates realised inflation

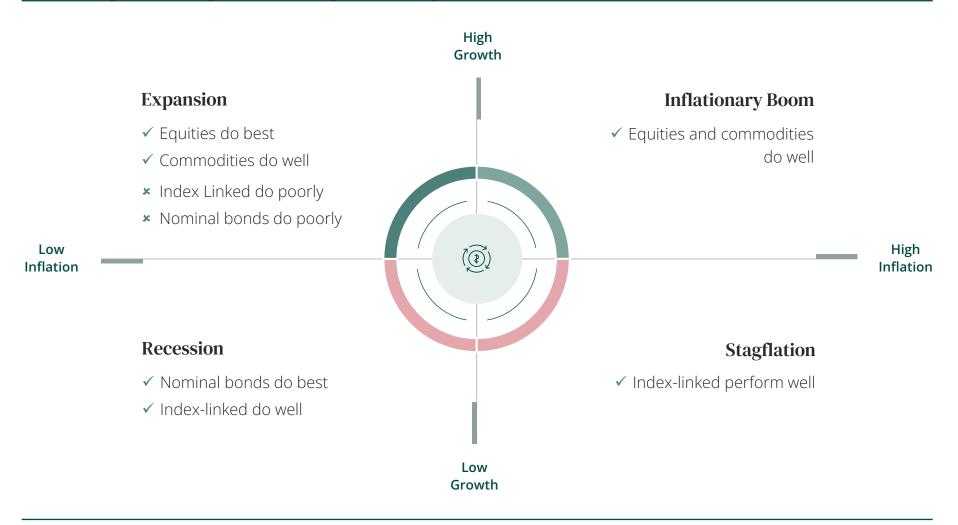

Source: Bloomberg Finance L.P.

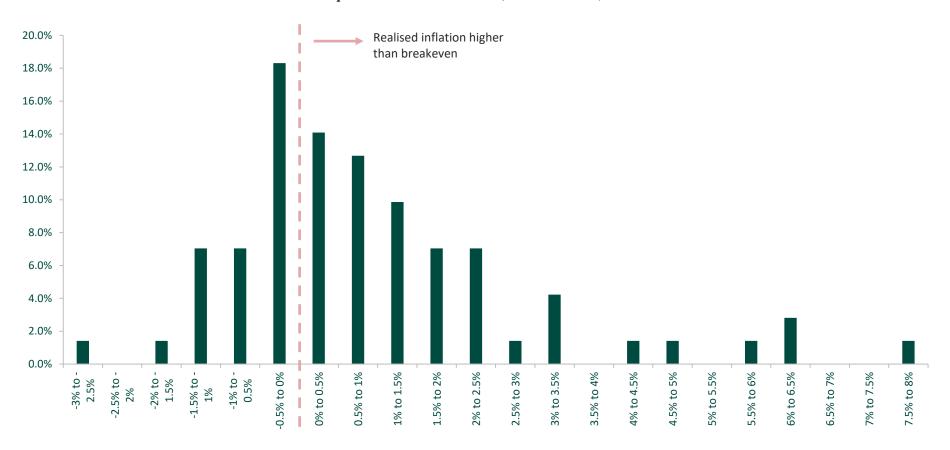

# Index-linked bonds perform well in scenarios where equities do not, and are the most reliable portfolio protector against stagflation

# As measured by realised inflation vs. breakevens, markets routinely underestimate inflation – by an average of 1% since 2004

Difference between 2Y Breakeven and subsequent realised inflation (% annualised)

Approach to Responsible Investing

## The principles underpinning our approach to responsible investment

#### Be honest

No greenwashing, no PR-led initiatives, no jargon. We believe in an accurate presentation of our activities not a marketing campaign.

## One firm, one rule

Our standards apply to all the funds we advise. We do not have ethical and by implication unethical funds.

## **Ethics**, not mathematics

There is no formula that can be applied in a uniform way to every situation. We emphasise judgement over simplistic third party ESG scoring systems.

## Don't disinvest, engage

When investors have the influence to effect change, it is most valuable to encourage positive transition rather than engage in blanket disinvestment.

## **Targeted**

As a small firm, we must focus our efforts where they will have the most impact, rather than taking a generalist approach.

## Driven by governance

Investors have multiple direct mechanisms to influence governance, so we primarily focus on governance even when the ultimate objective is positive social or environmental change.

## Integration, not separation

The entire team is collectively responsible for stewardship activities, with the ultimate responsibility lying with the chief executive. We do not have a standalone responsible investment team.

## Act, with humility

Every action results in both intended and unintended consequences. Reflect deeply on the risk that good intentions can lead to unintended negative outcomes.

## Responsible Investing

## ESG integration into investment process

#### **Direct Government Securities**

A majority of the assets held by the funds are invested in direct holdings of securities issues by governments including bonds, bills and cash.

In order to help access high ESG standards, we consider indices compiled by a range of NGOs and require sovereigns, at a minimum, to achieve strong rankings in at least four out of five of these criteria. In addition to using third party indices we also overlay our own subjective assessments which typically leads to material additional exclusions.

#### **Resultant Investable Universe ESG Criteria Applied** Index Criteria World Bank governance effectiveness index **United Kingdom** Top quartile Japan World press freedom index **United States** Good or satisfactory Canada Global freedom score Germany Australia Free rating UN human development index Very high human development rank **New Zealand** Sweden Net zero by 2025 statement Statement of intent by 2050 or earlier Denmark
